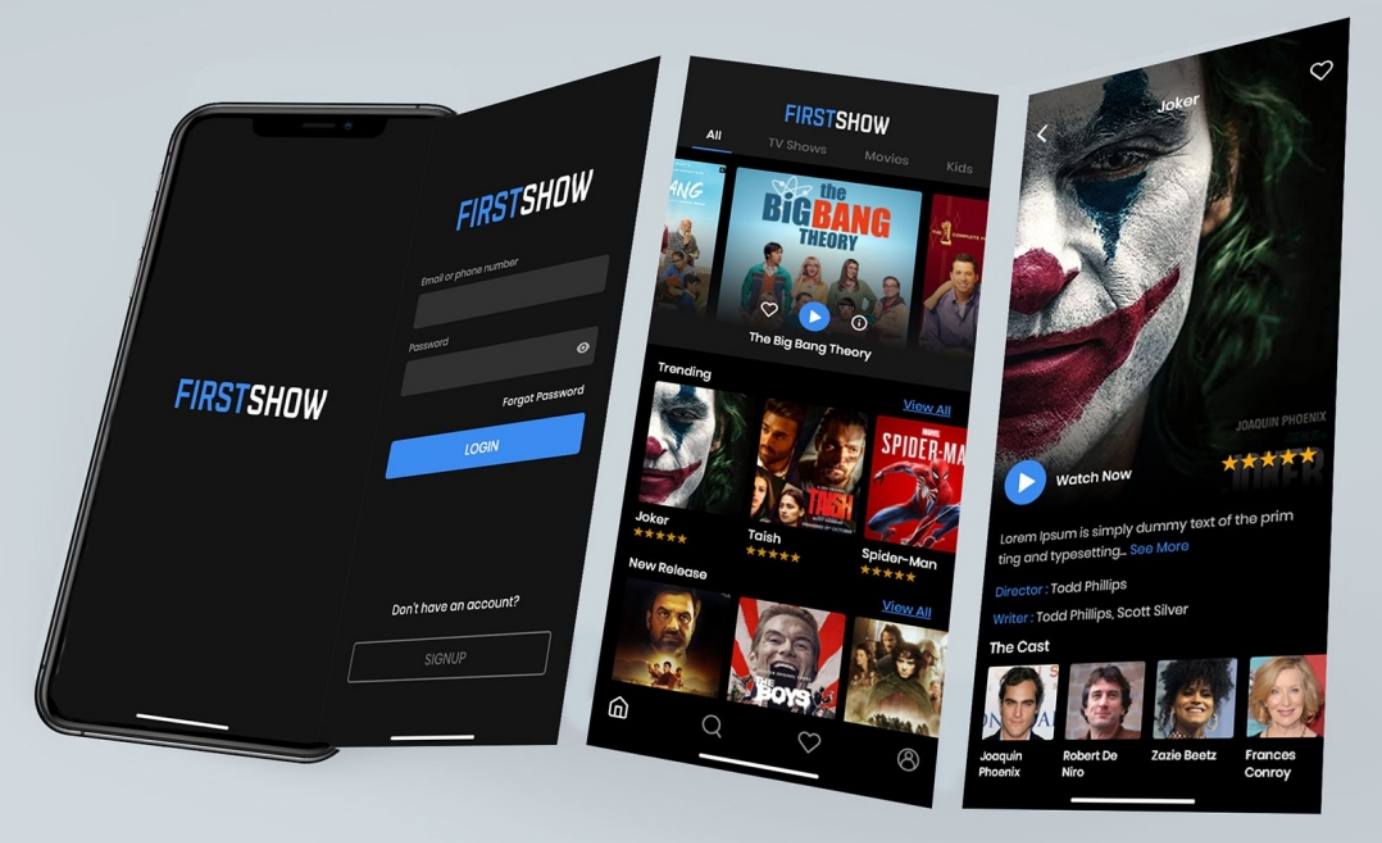
Your Video Streaming Partner

APPS ON DEMAND

Complete OTT Platform Setup - Start your Video Streaming Platform

www.sapiosolutions.com | 98851 44480

Sapio Solutions
with impact.



The video on demand platform that you get from us will be like other OTT Platforms with all the standard features, but we will work with you through any changes you need in design, development, deployment, hosting and maintenance.

India's first full fledged OTT Platform Development Agency who develop the application in Native technology with features like AVOD/SVOD & Live-stream Incorporated. We also provide end to end solution that is needed to run a OTT/VOD platform to function in the least amount of time. We also white-label the OTT platform in your company's name to ensure you get the best valuation if you intent to go for funding. We also can provide a code-review documentation for all our clients who pitch for VC funding. We also take 100% responsible for our coding and provide full assistance at any given point of time.

Our OTT Platform is 100% home made and has incorporated the latest features and is at par with Amazon Prime, Ullu, Hotstar and others in terms of technology, coding and performance.

We have added customized features as per your requirement.

You can charge a lesser fee from your subscribers and also promote the app across India and abroad to gain more subscribers who are interested in Movie / TV industry developments
